

Sepulchre Minerals

K1 Beads

Description: Kaolin beads are produced through the burning method using the latest technological standards. The color of the beads is white.

Application: **K1** are specifically designed for grinding Calcium Carbonate and Kaolin Clay.

Specification:

Composition, (%)	
- Kaolin	100
Color	white
Wear rate	500 – 1000 g / Mt
Effects on final product:	Whiteness – improved Particle size – enhanced Contamination - none
Roundness:	Excellent
Milling efficiency:	Excellent
Energy consumption:	Normal
- Sizes available Ø, (in increments of 0.2 mm)	0.4 – 20

Packaging: 25 kg net in plastic drums.
500 kg and 1000 kg big bags
