

Sepulchre Minerals

ZircoSil Beads

Description: King's ZircoSil beads are specifically developed to compete with fused zirconia silicate beads. The color of the beads is white / pearlish.

Application: For wet grinding and dispersion of ground calcium carbonate, kaolin clay, zirconia silicate, titanium dioxide, etc.

Specification:

Composition, (%)

- ZrO ₂	60
- SiO ₂	31
Real specific gravity	3.90
Bulk specific gravity	2.35
Moh's scale	8.0

Sizes available Ø, (in increments of 0.2 mm)

- 0.4 – 10 mm

Packaging: 20 kg net in plastic drums.
500 Kgs bags
1000 Kgs bags
